

2017 Junior Instructional Program

What: **Junior Golf Instructional Clinics** **June-July**
Hosted by our staff of PGA Professionals, this series of clinics is a great beginners program for children 7-18 years old. Our goal is to introduce children to golf, help them learn about the game, the course, the rules and etiquette and improve their golfing skills. The sessions are conducted in groups of children with similar skills in three separate age ranges.

Why group instruction?

Children learn better in a group setting with their peers. In addition, group instruction is low stress and fun for children when learning the rules, the unique etiquette and the social aspects of the game. **PLUS**, they make friends! And golf buddies!

Junior Golf Clubs: Quality golf clubs for children are critical to their enjoyment and development in the game. Adult clubs that are cut down to kid's size are too heavy and the golf shaft is too stiff for young athletes to manage without great difficulty. Our recommendation that USKids brand is one that specifically match quality with affordable pricing.
